Low-height Pneumatic Single Flush Concealed Cistern

The Geberit Low-height Pneumatic Single Flush Concealed Cistern is a compact and efficient solution for modern bathrooms. It is designed to be installed within a wall or behind a fixture, saving space and creating a sleek look. The cistern has a pneumatic flush actuation, which means it can be operated by a remote button or a flush plate. The cistern comes with a 90-degree flush bend and fastening materials. Concealed cistern only. Flush button sold separately.
