

astonian steel shower trays

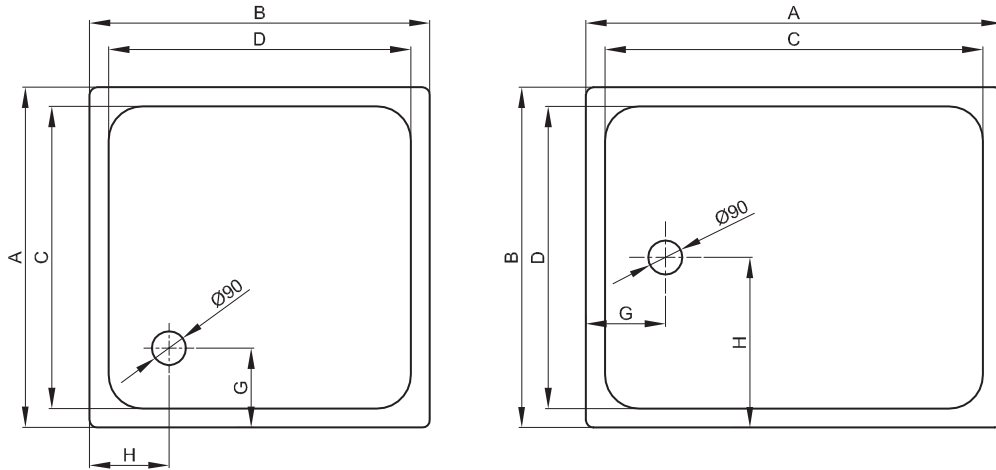

In addition to their sleek minimal look, steel shower trays are a versatile and durable alternative to composite stone, available in a huge range of sizes to suit almost any room. At 25mm or 35mm depth, our steel shower trays can be fitted surface mounted or flush to floor to create a seamless look. All trays are supplied with a noise reducing installation system. Please see below technical information for waste location

Depth	25mm or 35mm
Material	enamelled steel
